

2022 - 602 Sportsman Rules

- All cars must run the MSD 8727CT digital rev control limiter, 6,200 RPM max.
- All NEW engines must be purchased through the Speedway or a reputable retailer. All new engines must have proof of sale and documentation.
- All used engines with factory seals will be accepted.
- 602 engines are considered to be non repairable and non rebuildable. If factory seals are removed, the engine is considered expired and a new one must be purchased. If your engine has been rebuilt it is deemed illegal.
- All engines must remain stock.
- Absolutely no work can be done to the engine.
- Steel or Aluminum wheels are allowed, 2,350lbs.
- No sail panels.
- No cockpit adjustments besides brake bias.
- Any track stamped American Racer tire will be accepted. Minimum compounds are 33 left front, 38 right front, 44 left rear, and 48 right rear.
- Sunoco gas must be used, up to 110 octane.
- One single 4 barrel 650, 650hp, 750, 750hp stock carb must be used.
- No Tri-Y or stainless steel headers.
- All chassis must be at least 1 year old.
- Body rules can be found under the modified body rules.
- All other general rules and procedures apply.
